

## High School Summer Math Work

Dear Students,

Summer work is intended to keep important basic geometric and algebraic concepts fresh in your minds. These concepts are the foundation for all of your future math courses including the course you will soon begin.

Please make sure to read any instructions or notes included with the problems. If you encounter an exercise that you are not sure how to do, we have provided for you links to videos and websites at the end of this letter that will help you refresh your memory. There are no topics in this packet that you have not seen before. These are concepts that you should have a solid understanding of before entering your fall math course.

Please keep your summer work in a small notebook or folder. Complete each problem neatly **showing all work**, boxing your answer at the end of your work. Your teacher will collect the notebook/folder. A quiz or test over the material will count as your first grade of the new school year.

Knowledge of this material is important for achieving success early on, so we would encourage you to review your work the day before classes start if you completed the assignment early in the summer.

All students are welcome to stop by the classroom to ask questions. Also, feel free to contact us via email. All assignments will be due on **Monday, August 14<sup>th</sup>**.

**Remember, if you are stuck, don't give up!**

See you soon!
